SUMMARY

Third-year Computer Science student with a strong foundation in frontend development and backend systems. Experienced in building responsive web applications, leveraging React.js, and integrating REST APIs. Passionate about problem-solving and delivering scalable, user-centric solutions in a dynamic team environment.

EDUCATION

Vellore Institute of Technology, Vellore	B.Tech. in Computer Science & Engineering (IoT Specialization)	2023 – 2027
CGPA: 9.06 / 10		
Macro Vision Academy, Madhya Pradesh	Class XII (CBSE)	2022
Percentage: 85 / 100		
Mahesh Memorial Public School, Madhya Pradesh	Class X (CBSE)	2020
Percentage: 82 / 100		

SKILLS

Programming Languages: JavaScript (ES6+), Python, C, C++	
Frontend:	React.js, Redux Toolkit, React Router, HTML5, CSS3, Responsive Design
Backend:	Node.js, Express.js, REST APIs
Databases:	MongoDB, SQL (MySQL), Mongoose
DevOps & Cloud:	AWS (Foundational), Jenkins, Docker, Kubernetes
AI/ML (Foundational):	Generative AI concepts, Hugging Face Transformers
Tools & Platforms:	Git, GitHub, Postman, VS Code, Linux (Basics), Figma

PROJECTS

AI-Powered Interview Strategy Generator

React.js, Node.js, Express.js, Google Gemini API, MongoDB

- Developed a full-stack web application that generates personalized interview strategies by analyzing user resumes and job descriptions.
- Utilized Google's Gemini API to intelligently extract keywords, predict potential interview questions, and suggest technical preparation topics.
- Designed and implemented a responsive frontend using React.js, enabling seamless user input and intuitive display of generated strategies and match scores.
- Engineered backend APIs with Node.js and Express.js to securely process data, interact with the Gemini API, and store user information.

StarVideo – Video Streaming Backend Service

Node.js, Express.js, MongoDB, JWT, Cloudinary

- Designed and developed robust REST APIs for a video streaming platform, enabling core functionalities like video uploads, retrieval, and user interactions (likes, comments).
- Implemented secure JWT-based authentication and authorization with role-based access control to protect user data and content.
- Integrated Cloudinary to efficiently manage and optimize video and image asset storage and delivery.
- Engineered scalable data models using MongoDB and Mongoose, incorporating middleware for robust validation and error handling.

Medical Assistant Chatbot

Python, Streamlit, OpenAI API, LangChain, Hugging Face Transformers

- Developed a Generative AI-powered medical assistant chatbot utilizing NLP to provide accurate responses to health-related queries.
- Integrated and orchestrated large language models via LangChain, optimizing prompt engineering for improved response relevance.
- Built and deployed an interactive Streamlit web application, facilitating real-time user interaction and feedback.
- Improved response relevance and factual accuracy by structuring prompts with trusted medical data sources.

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified DevOps Professional – Oracle
- Generative AI using IBM Watsonx – IBM
- Python Foundation Certification – Infosys
- Database Management System – Infosys

LANGUAGES

English (Fluent) Hindi (Native)
